# Cross Curricular links

Within our Drama curriculum, we offer a variety of opportunities for cross curricular links, that benefit students at all levels. Our cross curricular links are as follows:

- **Literacy** - Students explore a range of challenging, exciting and engaging play texts. Through effective oracy students develop their use of drama vocabulary and the way they articulate their ideas. In year 7 and 8 students write explanations and evaluations of their work. In year 9-13 students write extended responses from the point of view of a performer, director and designer and evaluate their work and the work of others.
- **English**- In year 7 and year 8 students explore the plot, characters and themes of 'The Tempest' and 'A Midsummer Night's Dream' deepening their knowledge and understanding of these play texts in English.
- **Numeracy**- students learn about forced perspective and designing to scale.
- **History**- In year 8 students use their knowledge of World War I to help create their performance work.
- **PSHE**- Through the exploration of topics in Drama students have the opportunity to discuss and learn about marriage and relationships, other cultures, the moral compass, decision making and the acceptance of others and other peoples' beliefs

# Preparing for Life

At SNA, our Drama curriculum supports and further develops the following skills to prepare students for life beyond school in the world of work.

- **Creativity** – Students use drama and performance to respond imaginatively to a range of stimuli. They are encouraged to think 'outside the box' and produce work that is original. Students develop their improvisation and problem-solving skills.
- **Team work** – In Drama students work collaboratively to create performance work. Students develop their listening and responding skills through the creative and rehearsal process. Students also have the opportunity to direct and demonstrate emerging leadership skills.
- **Staying positive**- In Drama a nurturing, encouraging and supportive environment is created so students are able to step outside their comfort zone, take risks and try something new. Particularly throughout the devising process, resilience is an essential skill in order to continue developing material. Students also enjoy the positive feedback and praise from the audience after every performance.
